**Education, Simulation & Development Workshop: Development of Non-technical Skills through VAST in Low-Resource Settings**

**Workshop Fee:** 10 USD

Non-technical skills are the behavioural or inter-personal skills that underpin effective clinical practice. These skills can be practised and developed, just like procedural skills. This workshop will be an introduction to anaesthesia providers’ non-technical skills, and how these skills can be developed in low-resource settings. Lessons learned and illustrative examples will be drawn from the experience of the Vital Anaesthesia Simulation Training (VAST). This workshop will be suitable for those working in a low-resource setting, or those interested in helping support simulation activities in low-resource settings.

At the end of this workshop, participants will be able to:
1. Have a working knowledge of non-technical skills and how they apply to safe anaesthesia provision.
2. Discuss and participate in creative approaches to developing non-technical skills.
3. Explore the challenges and solutions for implementing non-technical skills training in low-resource settings.

**Development of Non-technical Skills through VAST in Low-Resource Settings**

- **Adam Mossenson, Australia**

**Education, Simulation & Development Workshop: How to Develop and Deliver Effective Remote Learning**

**Workshop Fee:** 10 USD

By the end of this session, learners will be able to:
1. Plan teaching sessions that account for the key differences between remote and in-person learning.
2. Identify how to use synchronous and asynchronous learning to maximise the benefit of remote learning.
3. Describe ways to engage learners over remote platforms.
How to Develop and Deliver Effective Remote Learning
Dylan Bould, Canada

How to Develop and Deliver Effective Remote Learning
Sonia Akrimi, United Kingdom

Session Date/Time: Monday, March 4, 2024  -  08:00 - 10:00
MR 325 (Level 3)

Education, Simulation & Development Workshop: VR and Immersive Technologies in Anaesthesiology - A First-Hand Experience
Workshop Fee: 100 USD

1. This hands-on workshop will provide the attendee with an opportunity to understand the most recent evidence supporting the use of VR for preoperative anxiety, pain management, procedural support, clinical decision support and anaesthesia education.
2. Each attendee will experience different VR environments for preoperative anxiety, pain management, procedural support, clinical decision support and anaesthesia education.

MR 334 (Level 3)

Education, Simulation & Development Workshop: Introduction of Simulation in Low-Resource Settings
Workshop Fee: 10 USD

Simulation-based education is a highly effective method of develop clinical and behavioural skills. There are many barriers that may limit the use of simulation in low-resource settings. This workshop will explore the pre-requisites for use of simulation training and will use illustrative examples drawn from Vital Anaesthesia Simulation Training (VAST) to explore how to build capacity for simulation training in low-resource settings. This workshop will be suitable for those working in a low-resource setting, or those interested in helping support simulation activities in low-resource settings.

At the end of this workshop, participants will be able to:
1. Analyse the benefits and limitations of simulation training.
2. Specify the values and goals the simulation activity is aiming to address.
3. Identify the minimum requirements for conducting effective simulation activity.
4. Develop an implementation plan and realistic timeline for sustainable delivery.

MR 332 (Level 3)
Education, Simulation & Development Workshop: How to Give a Better Presentation and Large Group Teaching

Workshop Fee: 10 USD

By the end of this session, learners will be able to:
1. Identify ways they can make visual aids more effective.
2. Include ways to increase engagement and attention by learners.
3. Plan presentations that are better understood and more memorable.

How to Give a Better Presentation and Large Group Teaching

PROGRAMME
Tuesday, March 05, 2024

Session Date/Time: Tuesday, March 5, 2024 - 08:15 - 09:45
MR 333 (Level 3)
Education, Simulation & Development Workshop: From Inspiration to Publication
Workshop Fee: Complimentary

By the end of this session, learners will be able to:
1. List three steps necessary to transform an idea into a practical project.
2. Describe three important elements of writing a manuscript.
3. Analyse the suitability of a manuscript for publication.

From Paper to Publication
Angela Enright, Canada

From Project to Paper
Dylan Bould, Canada

From Proposal to Project
Bhiken Naik, United States

Session Date/Time: Tuesday, March 5, 2024 - 13:00 - 14:00
MR 324 (Level 3)
Education, Simulation & Development: Findings from Utstein Meeting in Simulation

By the end of this session, learners will be able to:
1. Describe the impact of simulation based education (SBE) in healthcare professional training.
2. Identify high-priority domains in SBE for anaesthesia training.
3. Describe the development of a global agenda to integrate SBE in anaesthesia specialist training through Utstein-style collaborative meeting.
4. Discuss the barriers and facilitators to implementing SBE training in different settings.

13:00 Chair: Session Introduction
Rodrigo Rubio, Mexico

13:02 Findings from Utstein Meeting in Simulation - Adapting Recommendations to Local Culture and Context
Maytinee Lilaonitkul, United States

13:47 Questions and Answers

Session Date/Time: Tuesday, March 5, 2024 - 14:00 - 15:00
MR 324 (Level 3)
Education, Simulation & Development: The New Era of Remote Learning

There exist large global disparities in access and quality of medical education and training. In 1950 medical knowledge doubled in 50 years. In 2010 it doubled every 73 days. With this rapid expansion of medical knowledge global gaps are deepening and accelerating, necessitating innovative ways to share education. Through this session, learners will:
1. Understand various ways education and training can be delivered remotely.
2. List quality indicators for remote and online educational initiatives.
3. Explore frameworks for building globally accessible education and training programs.

14:00  Chair: Session Introduction  
Vanda Abi Raad, Lebanon

14:02  The Implementation of a Remote Hands-on Airway Management Training Course in China - The “All-In-One” Airway Training Program  
Wenxian Li, China

14:17  Clinical Telementoring Program for Remote Settings  
Ana Crawford, United States

Session Date/Time: Tuesday, March 5, 2024  -  15:30 - 16:30  
MR 324 (Level 3)

Education, Simulation & Development: Simulation in Resource-Constrained Settings

Simulation is frequently associated with modern technology and high resource infrastructure often involving large investments by institutions. However, not everyone has access to these investments and simulation has proven to be an effective learning methodology. By the end of this session, learners will be able to:
1. Describe how colleagues from limited resource settings are using simulation for education.
2. Discuss how one might develop simulation opportunities without requiring large economical investments.

15:30  Chair: Session Introduction  
Maytinee Lilaonitkul, United States

15:32  Few Resources/No Problem.. The Latin American Solution  
Rodrigo Rubio, Mexico

15:47  Mobile Obstetric Simulation Team Training in East Africa

Education, Simulation & Development: Emerging Approaches for Anaesthesia Education - Around World in 60 Minutes
This session aims to provide a tour of the latest and most innovative approaches to anaesthesia education from around the world. In just 60 minutes, attendees will gain insights into cutting-edge techniques, technologies, and strategies that are shaping the future of anaesthesia education. By the end of this session, learners will be able to:
1. Describe several innovative approaches to teaching and learning that can be adapted and integrated into their own educational programs.
2. Gain insight into how emerging technologies, such as e-learning platforms, podcasts, and 3-D printing are being leveraged to enhance anaesthesia education.

08:30  Chair: Session Introduction
Faye Evans, United States

08:32  3D Printing in Anaesthesia Education
Ruth Shaylor, Israel

08:44  Social Media for Anaesthesia Education
Murali Thondebhavi, India

08:56  Apps for Anaesthesia
Ahmed Rhassane El Adib, Morocco

09:08  Hybrid E-learning - Spinal Anaesthesia Project in Nambia

MR 324 (Level 3)
Education, Simulation & Development: Leadership and Management - How Do You Lead Change in Anaesthesia

Through this session, learners will:
1. Compare and contrast different approaches to leadership in times of change/crisis.
2. Explain how leadership behaviour can lead to change.
3. Discuss the attributes of a healthy team.
4. Describe the challenges facing leaders and followers in a LMIC setting.

08:30  Chair: Session Introduction
       Rob McDougall, Australia

08:32  Leading Healthy Teams - Challenges and Lessons Learned
       Chris Bowden, Australia

08:47  Leadership in Times of Crisis-Adapting to the New Normal
       Marie Aouad Maroun, Lebanon

09:02  Leading and Working with Multi-Cadre Anaesthesia Teams in LMIC: Opportunities and Challenges
       Stephen Okelo, Kenya

09:17  Questions and Answers

Session Date/Time: Thursday, March 7, 2024  -  09:30 - 10:30
MR 324 (Level 3)
Education, Simulation & Development: Emerging Leaders - Graduates from the WFSA Supported Programs

The WFSA offers a range of subspecialty fellowships to anaesthesiologists from low and middle income countries. A well-established program which has enabled subspecialty training to over 400 fellows from over 60 countries; In this session we will hear first-hand from some of the previous WFSA fellows about their experience. This session would be useful to anyone currently or considering leading or undertaking a fellowship or who is interested to hear more about the programme and its impact. In addition, we will hear one anaesthesiologists’ career journey rising through the ranks from patient attendant to anaesthesiologist. Through this session, learners will:
1. Gain a greater understanding of the impact of the WFSA Fellowship Programme.
2. Learn more about a non-standard career pathway to becoming an anaesthesiologist.
3. Explore frameworks for building globally accessible education and training programmes.

09:30  Chair: Session Introduction
       Jolene Moore, United Kingdom

09:32  Paediatric Anaesthesia Fellowship
       Adisa Šabanović Adilović, Bosnia and Herzegovina

09:44  Paediatric Anaesthesia Fellowship
       Francoise Nizeyimana, Rwanda

09:56  Obstetric Anaesthesia Fellowship
       Milena Chaves Ureña, Costa Rica
Session Date/Time: Thursday, March 7, 2024 - 10:50 - 11:50
MR 324 (Level 3)

Education, Simulation & Development: Strengthening the Anaesthesia Workforce: How Can We Address Workplace Based Stress and Retention

This session will provide learners:
1. An overview of the key drivers of workplace stress and challenges for retention in different contexts.
2. Strategies that have been put in place to address these concerns; stories of success, and barriers to improvement.
3. Looking forward, a roadmap for future initiatives.

10:50      Chair: Session Introduction
            Adam Mossenson, Australia

10:52      Perspective from Southern Africa
            Hazel Mumphansha Sonkwe, Zambia

11:04      Perspective from Latin America
            Pedro Ibarra, Colombia

11:16      Perspective from the Middle East
            Vanda Abi Raad, Lebanon

11:28      Perspective from Europe
            Miodrag Milenovic, Serbia

11:40      Questions and Answers
