A 29-year-old male patient is presenting for semi-elective low back surgery. He is a recovering substance addict (including opioids) and is very worried about “getting hooked” again if he is given narcotics. The delegates in this session will discuss the different interventions that are possible to address pain management in the patient who is a recovering addict.

1. Educational interventions.
2. Psychological interventions.
3. Medical interventions.

_Acute Pain_
_Gouhar Afshan, Pakistan_

_Cancer Pain_
_Jae Chul Koh, Republic of Korea_

_Intractable Pain: What is challenging for pain physicians. Delegates in this session will discuss pain chronification and how to manage chronic primary pain or nociplastic pain, including complex regional pain syndrome._

1. Transition from Acute to Chronic Pain.

**Intractable Pain CRPS**

*Ana Schwartzmann, Uruguay*
