A 29-year-old male patient is presenting for semi-elective low back surgery. He is a recovering substance addict (including opioids) and is very worried about “getting hooked” again if he is given narcotics. The delegates in this session will discuss the different interventions that are possible to address pain management in the patient who is a recovering addict.

1. Educational interventions.
2. Psychological interventions.
3. Medical interventions.

Acute Pain
Gouhar Afshan, Pakistan

Cancer Pain: The Full Spectrum of Care. Delegates in this session will discuss cancer pain from the initial phase to its palliative care.

1. Emerging Treatment for Managing Diverse Cancer Pain.
2. Intrathecal Drug Delivery: The Best Timing and Indication in Cancer.

Cancer Pain
Jae Chul Koh, Republic of Korea

Intractable Pain: What is challenging for pain physicians. Delegates in this session will discuss pain chronification and how to manage chronic primary pain or nociplastic pain, including complex regional pain syndrome.

1. Transition from Acute to Chronic Pain.

**Intractable Pain CRPS**

*Ana Schwartzmann, Uruguay*
